Content.....	2
Omniva plugin settings.....	3
Review orders.....	8
Calling a courier.....	9
Order review.....	9

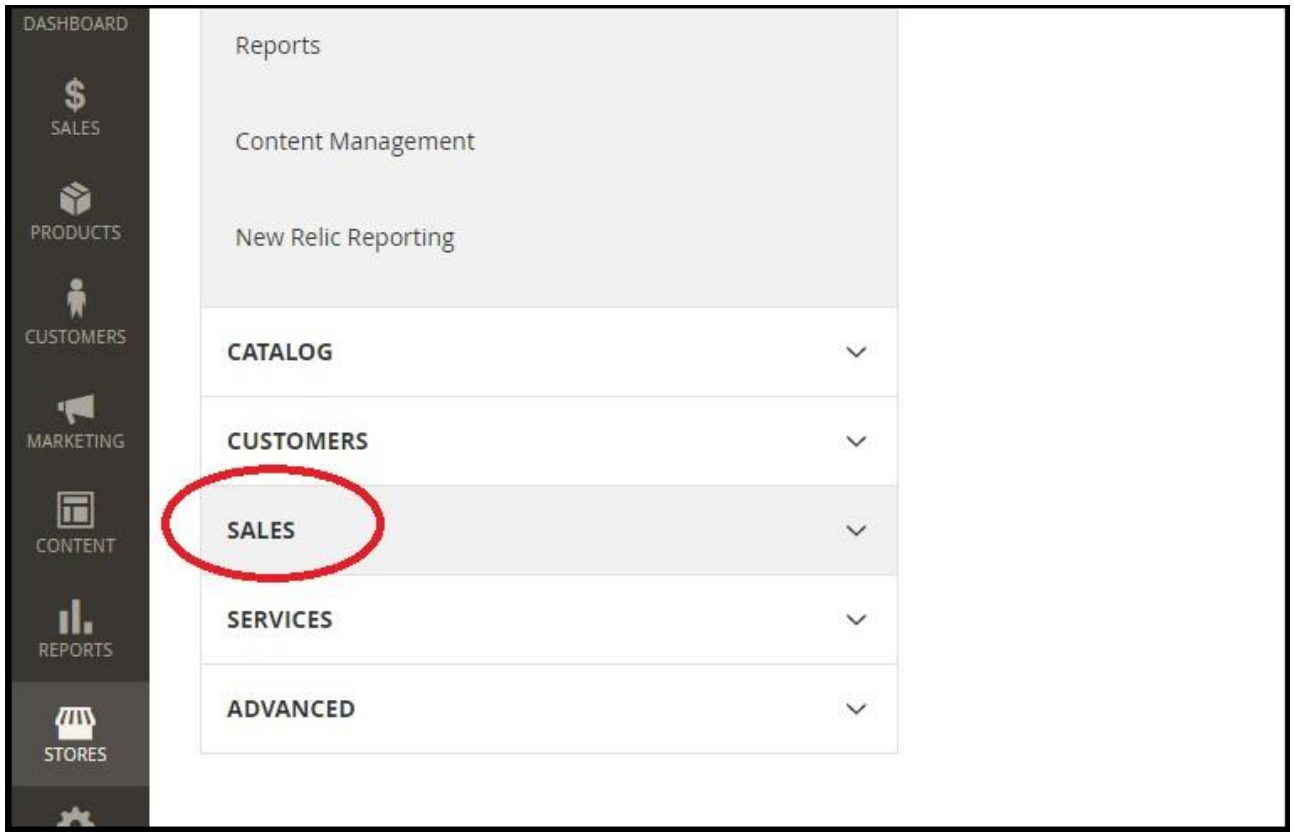

This guide is intended to explain how the Omniva plugin works in Magento 2.1 - 2.4. Also, help you understand how to perform basic plugin settings and how to manage Omniva shipment orders.

Omniva plugin settings

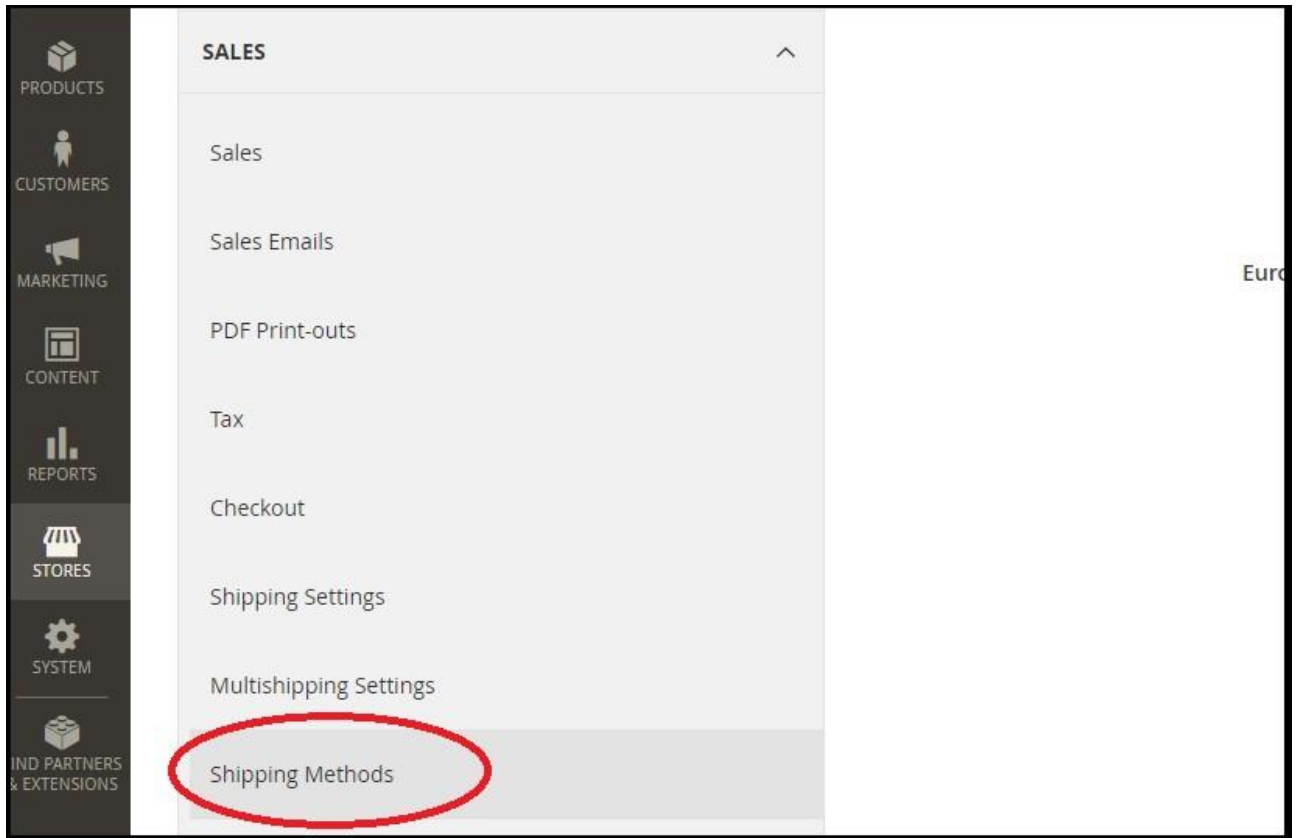

- To perform basic settings for the Omniva plugin, navigate to the button named STORES and select the box to the right named CONFIGURATION:

In the new field that opens, select the section named SALES:

- Click the SALES button to select SHIPPING METHODS:

- When a new window opens, you will see the OMNIVA section next to all other existing couriers. This section is just below the bottom of the window. Here are the key adjustments to the Omniva plugin:

Omniva

Enabled for Checkout <small>[website]</small>	Yes	<input type="checkbox"/> Use system value
Title <small>[store view]</small>	Omniva	<input checked="" type="checkbox"/> Use system value
User ID <small>[website]</small>	*****	
Password <small>[website]</small>	*****	
Gateway URL <small>[website]</small>	https://edixml.post.ee	<input checked="" type="checkbox"/> Use system value
Company name <small>[website]</small>	Test Mijora	
Bank account number <small>[website]</small>	LT*****	
Company street address <small>[website]</small>	Test str.	
Company city <small>[website]</small>	Test city	
Company postcode <small>[website]</small>	41001	
Company country code <small>[website]</small>	LT	
Company phone <small>[website]</small>	+37060000000	

- In the first four fields, the system will ask you to enter the URL, user ID, and password. You should obtain the following information from the Omniva manager:

Title <small>[store view]</small>	Omniva
User ID <small>[website]</small>	*****
Password <small>[website]</small>	*****
Gateway URL <small>[website]</small>	https://edixml.post.ee

- Enter your company details in the lines below:

Company name <small>[website]</small>	Test Mijora
Bank account number <small>[website]</small>	LT*****
Company street address <small>[website]</small>	Test str.
Company city <small>[website]</small>	Test city
Company postcode <small>[website]</small>	41001
Company country code <small>[website]</small>	LT
Company phone <small>[website]</small>	+37060000000

- Once you have entered the above information, you will need to enter the following information in the other fields:
 1. The name of the courier that will be displayed on the website.
 2. Shipping cost by courier.
 3. Shipping price using shipping terminals.
 4. Earliest pick-up time.
 5. Latest pick-up time.
 6. Choose a pick-up method from your company. There are two options: on arrival by courier or via the parcel terminal.
 7. Identify shipping methods. Again: courier and / or parcel terminal.

Pick up from store type [website] Courier Use system value

Maximum Package Weight [website] 150 Use system value

Free Shipping Amount Threshold [website] Disable

LT Courier shipping price [store view] 2

LT Parcel terminal shipping price [store view] 2

LV Courier shipping price [store view] 2

LV Parcel terminal shipping price [store view] 2

EE Courier shipping price [store view] 2

EE Parcel terminal shipping price [store view] 2

EE Courier Plus shipping price [store view]

Combine labels [store view] Yes

Allowed Methods [website] Use system value

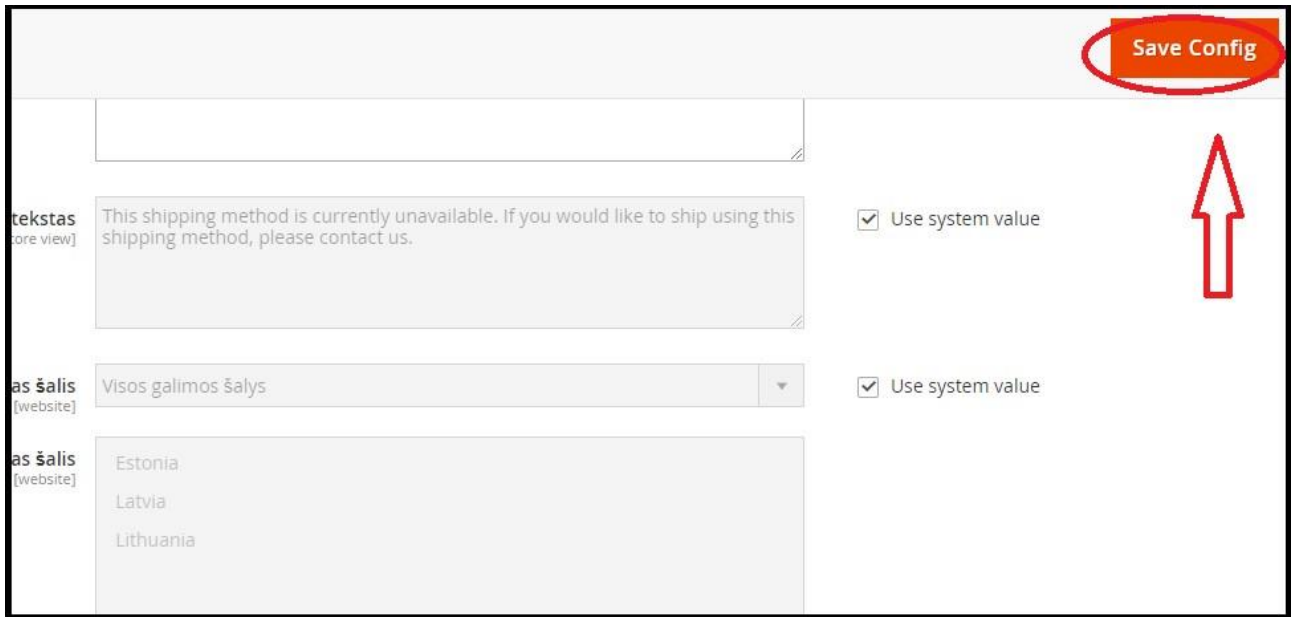

- Courier
- Parcel terminal
- Courier Plus

- The last window will automatically mark the three active countries: Lithuania, Latvia and Estonia. If you have online stores in these countries, these settings apply equally.

Ship to Specific Countries [website]

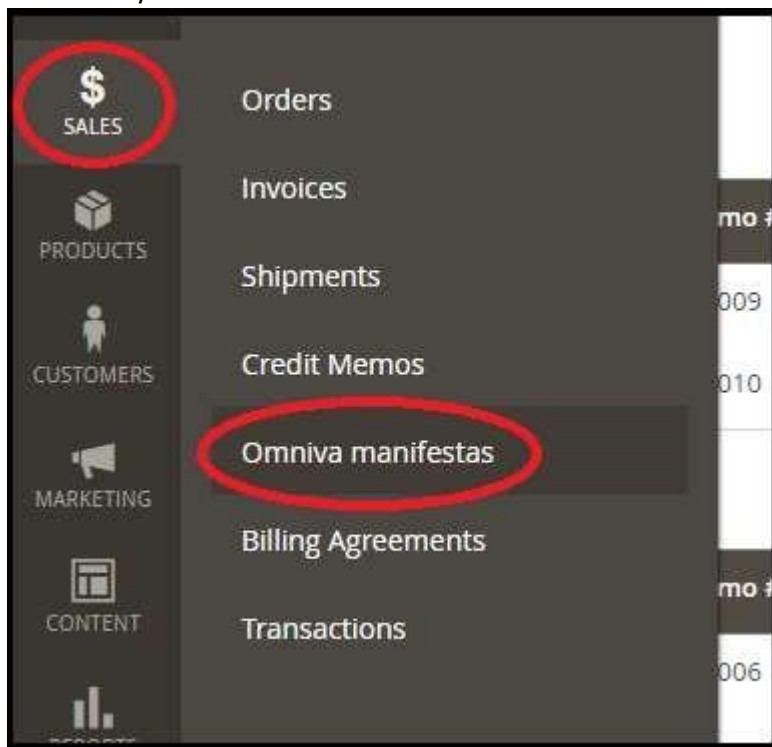

- Estonia
- Latvia
- Lithuania

- After making all the settings, click the Save config button in the right corner of the screen. Clicking this button will save all updated information and settings:

Review orders

- To view all orders for Omniva Courier, select the SALES button in the main window of the Magento 2 system and click on the **Omniva Manifest**:

- In the new window that opens, you will see the history of all orders broken down by date. This will make it easier for you to process Omniva shipment orders. In this window you can:

1. To print each label individually or to print all at once, click the Print Labels button below. Clicking Generate Labels will re-generate new shipment labels and assign new tracking numbers.

2. Also, a daily manifest can be printed, which must be signed by the courier. You can print it by clicking the button labeled Print Manifest below.

Omniva manifest

Calling a courier

You can call the courier by going to the list of all orders and clicking Call Omniva

The screenshot shows the 'Orders' dashboard. On the left is a sidebar with navigation options: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, and CONTENT. The main area has a search bar, filters, and a table of orders. The 'Call Omniva' button is highlighted with a red box. Below the table, there are pagination controls and a table header with columns: ID, Purchase Point, Purchase Date, Bill-to Name, Ship-to Name, Grand Total (Base), Grand Total (Purchased), Status, Action, Allocated sources, and Signifyd Guarantee Decision.

Order review

When you open an Omniva order, you can view the selected parcel terminal and change it (if the order is not closed). You can also see the history of sticker generation.

Payment Information

Check / Money order

The order was placed using EUR.

Omniva siuntų terminalas: Pasvalio MAXIMA Avižonio paštomatas, Pasvalio r. sav., LT
